     Public Notice Disadvantaged Business Enterprise (DBE) Goal For Federal Fiscal Years 2020-22 ...... 21
Introduction

Under the requirements of the Code of Federal Regulations 49 C.F.R. Part 26.45 (Participation by Disadvantaged Business Enterprises in U.S. Department of Transportation (USDOT) Programs), Marin County Transit District developed an overall Disadvantaged Business Enterprise (DBE) goal for DBE participation from Federal Fiscal Year (FFY) 2020 through FFY 2022 in contracting opportunities that may include federal funding. Marin Transit’s proposed overall DBE goal for FFY 2020-22 is 3.3% of the federal financial assistance for FTA-assisted contracts, exclusive of contracts related to the purchase of transit vehicles. ¹

The regulations require federal recipients to prepare the overall goal using a two-step process. According to the USDOT Tips for Goal Setting, the recipient must first determine a base figure for the relative availability of certified DBEs and potentially certified Minority and Woman-owned Business Enterprises, hereafter collectively referred to as Disadvantaged Business Enterprises (DBEs), in the relevant market area. The base figure is intended to be a measurement of the current ready, willing, and able DBEs as a percentage of all businesses ready, willing, and able to perform the recipient’s anticipated FTA-assisted contracts.

Next, the recipient must examine all relevant evidence to determine what adjustment, if any, is needed to the base figure in order to arrive at an overall goal. The final adjusted figure is the recipient’s overall goal and represents the proportion of federal transportation funding that the recipient is expected to allocate to DBEs during the subsequent three federal fiscal years. Once the agency determines the adjusted overall goal, the process requires considering what portion of the goal will be met by race- and gender-neutral measures.

If a recipient finds that it can meet its overall goal with race- and gender-neutral measures, those measures must be utilized. In contrast, if the recipient determines it cannot achieve the entire overall goal using only race- and gender-neutral measures, it must establish a race- and gender-conscious portion of the overall goal. Development of a race- or gender-conscious goal is subject to a 2005 legal opinion that affects federal recipients in California. Subsequent to that opinion, Western States Paving v. State of Washington (Western States)², recipients in the Ninth Circuit cannot consider the use of a race- or gender-conscious goal unless a finding of statistically significant disparity has been made for the ethnic and gender groups to be included in the race- or gender-conscious goal. The Ninth Circuit determined that statistical findings demonstrating a “small disparity” are of insufficient probative value to meet the strict scrutiny standard. Citing Croson, the

¹ Effective February 28, 2011, the USDOT amended the DBE regulations set forth in 49 CFR Part 26 as described in the Federal Register, Volume 76, Number 22 and Vol.79 No. 221 October 2, 2014 Part II Disadvantaged Business Enterprise Program Implementation Modifications; 49 CFR Part 26 [Docket No. OST-2-12-0147]
² Western States Paving Co. v. United States & Washington State Department of Transportation, 407 F. 3d 983 (9th Cir. 2005).
Court declared that an inference of discriminatory exclusion could arise where there is a statistically significant disparity between the number of qualified minority contractors willing and able to perform a particular service and the number of such contractors actually engaged by the locality or its prime contractors.

This Overall DBE Goal Setting Report is based on the DBE regulations contained in 49 CFR Part 26.45, as amended, the decisions of the United States Federal Court, and the USDOT Guidance Memorandum. The goal identifies the relative availability of DBEs based on evidence of ready, willing, and able DBEs in relationship to all comparable businesses known to be available to compete in the Marin Transit’s FTA-assisted contracts.

In April 2019, Marin County Transit District participated with peer Bay Area transit and transportation agencies in outreach sessions to obtain public participation and input in developing DBE goals. The overall DBE goal reflects staff’s determination of the availability of DBE opportunities and the level of DBE participation expected absent the effects of discrimination.

Marin County Transit District will submit this revised goal methodology for FFY 2020-2022 to the Federal Transit Administration (FTA) for review. The District’s recommended overall DBE goal for the period is 3.3%, which reflects the weighted base figure. The 3.3% goal will be achieved through race-neutral methods. The FTA reporting period for the recommended overall goal will be October 1, 2020 to September 30, 2022.

Marin Transit Federally Assisted Contract Opportunities from Fiscal Years 2020 through 2022

Marin Transit has calculated the projected number, types of work, and dollar amounts of contracting opportunities that will be funded, in whole or in part, by U.S. DOT federal financial assistance for the three-year reporting period. Exclusive of contracts for vehicle purchases, FTA-assisted contracting opportunities for Fiscal Years 2020 through 2022 are expected to primarily consist of onboard vehicle equipment and a new paratransit contract to start in the last quarter of FFY 2022. Additional projects may be undertaken if additional federal revenue becomes available, and Marin Transit will adjust the overall DBE goal if necessary. The anticipated contracts and purchases are listed below in Table 1. Note that DBE goals for Transit Vehicle Manufacturers are established through a separate FTA process.

</tbody>
</table>

The total amount of anticipated funds available for DBE opportunities in federally assisted contracts and purchases is $2,898,700 during the three-year reporting period. This amount excludes transit vehicle purchases.

Marin Transit routes uses Caltrans-administered 5311 funds to supports rural transit services. For the upcoming triennial period, Marin Transit has agreed to report these 5311 expenditures directly to FTA. While there is DBE participation in the current rural operations contract, Marin Transit will not rebid this contract in the FFY 2020-22 timeframe.

Overall DBE Goal Methodology

The overall goal is expressed as a percentage of the total amount of U.S. DOT funds Marin Transit anticipates expending in the three forthcoming fiscal years. As described below, Marin Transit used a two-step process to establish the overall DBE goal.
Step 1: Compute Base Figure
As specified in 49 CFR 26.45(c), Marin Transit developed a base figure to determine the relative availability of DBEs to perform work on the anticipated contracts and purchases. The formula for calculating the relative availability of DBEs for each project is:

\[
Base \, figure = \frac{Ready, \, willing, \, and \, able \, DBEs}{All \, firms \, ready, \, willing \, and \, able \, (including \, DBEs \, and \, non-DBEs)}
\]

Based on guidance from FTA and the U.S. DOT Office of Small and Disadvantaged Business Utilization, Marin Transit computed a weighted base figure that considers the relative size of the anticipated contracts.

The weighted base figure was developed by:

1) Using the 2019 California Unified Certification Program Directory to identify the number of registered DBEs willing to perform work in Marin County Transit District’s market area for each of the anticipated procurements, based on the NAICS (North American Industry Classification System) code(s) most relevant to each contract or purchase. Marin County Transit District’s market area is determined based on where the substantial majority of bidders are located, as documented in the District’s Bidders List. For the purposes of the DBE goal, the market area is defined as the San Francisco–Oakland–Hayward, CA Metropolitan Statistical Area (MSA) combined with the Santa Rosa, CA Metro Area MSA. This combined area includes six counties: Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Sonoma Counties. The number DBEs in the market area, by NAICs code, is listed in Table 2.

2) Using 2016 County Business Patterns (CBP) data from the U.S. Census Bureau to identify the total number of businesses available in Marin County Transit District’s market area for work on each contract, based on the same NAICS codes. This data was released on April 19, 2018. Table 2 lists the number of businesses in the market area, by NAICs code.

3) Dividing the number of DBEs by the number of all businesses to determine the relative availability of DBEs in the market area for each contract and weighted for contracts with more than one identified work category. The proportion of DBEs available by each procurement type is listed under “% DBE” in Table 3.

Table 4 aggregates anticipated contract expenditures by NAICS code identified for contracting and possible subcontracting opportunities. The table assigns both a proportionate dollar amount for each code and a percentage of the total anticipated estimate of federal dollars.

The Base Figure is derived by dividing the number of ready, willing, and able DBE firms identified for each work category by the number of all firms identified for each corresponding work category (relative availability), weighting the relative
availability for each work category by the corresponding work category weight from Table 4 (weighted ratio), and adding the weighted ratio figures together.

Base Figure = \[ \sum \left( \frac{\text{Number of Ready, Willing, and Able DBEs}}{\text{Number of All Ready, Willing, and Able Firms}} \times Weight \times 100 \right) \]

</tbody>
</table>

As shown in Table 5 above, the **Weighted Base Figure** is equal to the sum of the **Weighted Ratios** for all NAICS Work Categories and is calculated at 6.63%.

**Step 2: Adjust Base Figure**

Per 49 CFR 26.45(d), following calculation of a base figure, all available evidence must be examined to determine what adjustment, if any, is needed to the base figure to arrive at the overall DBE goal. The primary form of evidence available is the past participation of DBEs in Marin Transit contracting. The second is that Marin Transit will sole source its procurement of on-board vehicle equipment reflecting current systems and technologies.

**Bidders’ List - Section 26.45(c.3)**

Marin Transit maintains a Bidder’s list as set forth in 49 CFR Part 26.11 of bidders for its federal and non-federally assisted projects. Marin Transit has reviewed this
list and determined that the data derived from this list substantiates the market area for contractors, including DBE contractors, as outlined above.

Sources from Organizations and Institutions - Section 26.45(g.1)
Directly and through the Business Outreach Committee, Marin Transit communicates with various contractor associations, minority business associations, and the DBE and SBE business communities in general.

Applicability of Disparity Studies
Marin Transit has met its previous overall DBE goal, in a non-federally funded project, through race-neutral means. In developing the FFY 2020-22 DBE goal, Marin Transit staff have reviewed three disparity studies. Findings from the Caltrans and SFMTA studies are described below. In both cases, the size and nature of their projects differ significantly from Marin Transit’s projects. The Santa Clara Valley Transportation Authority (VTA) recently completed a disparity study, which they have not released to the public. Marin Transit’s market area does not include Santa Clara County, though our respective market areas include Bay Area counties to the north. This section also summarizes VTA’s findings.

Marin Transit will consider the findings of these and future disparity studies in the conduct of its DBE participation program, including outreach and education activities with the Bay Area Business Outreach Committee, to ensure access to bid opportunities for all eligible MBE/WBE’s.

Caltrans issued a draft FTA Disparity Study for comment on May 30, 2019. The draft study found that minority-and woman-owned businesses participation in transit-related contracts that Caltrans and subrecipient local agencies awarded during the study period exceeded what one might expect based on the availability of those businesses for that work. Results did vary substantially across individual groups as follows:

- Three groups exhibited disparity indices substantially below parity: non-Hispanic white woman-owned businesses, Asian Pacific American-owned businesses, and Black American-owned businesses.
- Three DBE categories did not exhibit a disparity: Hispanic American-owned businesses, Native American-owned businesses, and Subcontinent Asian American-owned businesses.

Minority-and woman-owned businesses considered together exceeded parity on both prime contracts and subcontracts. Results for individual groups indicated that:

- Three groups exhibited disparity indices substantially below parity on prime contracts: non-Hispanic white woman-owned businesses, Asian Pacific American-owned businesses, and Black American-owned businesses
- Black American-owned businesses were the only group that exhibited a disparity index substantially below parity on subcontracts.

The draft Caltrans study also analyzed the results separately for transit-related professional services and goods and services contracts. It found overall that minority-and woman-owned businesses did not show disparities for professional
services contracts or for goods and services contracts. However, disparity analyses results differed by contracting area and DBE group:

- Three groups exhibited disparity indices substantially below parity on professional services contracts: non-Hispanic white woman-owned businesses, Asian Pacific American-owned businesses, and Black American-owned businesses.
- Two groups exhibited disparity indices substantially below parity on goods and services contracts: non-Hispanic white woman-owned businesses and Black American-owned businesses.

San Francisco Transportation Authority (SFMTA) completed a disparity study in early 2016. The SFMTA marketplace for construction and related goods contracts consists of four Bay Area counties (San Francisco, Alameda, San Mateo, and Santa Clara) and Los Angeles County. SFMTA’s marketplace for professional services contracts are the same four Bay Area counties of San Francisco, Alameda, San Mateo, and Santa Clara. Marin Transit’s market area includes the North Bay and does not include Santa Clara or Los Angeles Counties.

The SFMTA Disparity Study’s findings include:

- SFMTA’s race/gender-neutral measures appear to be effective for Minority-owned businesses (MBEs) in construction and professional services contract categories with two exceptions.
- Evidence supports a conclusion that race-neutral measures have not assisted Black American construction contractors to participate fully and equitably in SFMTA federally assisted construction contracts.
- Women-owned businesses (WBEs) are substantially underutilized on SFMTA FTA-funded contracts, whether WBEs participate as prime contractors or subcontractors in either construction or professional services contract categories, inclusive of goods.

Santa Clara Valley Transportation Authority (SCVTA) completed a disparity study in March 2019. SCVTA is in Silicon Valley, and has responsibility for transit, highways, and the BART extension project in Santa Clara County. While SCVTA has not released the study to the public, they posted the findings on their website at www.vta.org/osdb under Outreach Events, as VTA Final Findings.

The VTA study found no disparities in prime contracts for small construction projects worth under $1 million and under $25,000. For professional services prime contractors, the study found disparities for contracts valued at under $500,000 and under $50,000 for African Americans, Hispanic Americans, and Caucasian Women. For prime contractors supplying goods, equipment, and supplies, the VTA study found disparities for purchases valued at under $500,000 and under $50,000 for African Americans, Asian Pacific Americans, and Hispanic American.

For subcontractors, the VTA study identified disparities in construction subcontracts for African Americans, Asian Pacific Americans, and Subcontinent Asian Americans. For subcontracted professional services, the study found a disparity for African...
Americans. VTA intends to take the following actions to increase Race and Gender-Neutral DBE participation:

- Form partnerships with private firms and nonprofits to provide technical assistance and support services;
- Maintain adequate staff in the Office Business Diversity Programs;
- Use direct contracting to award small contracts to SBEs;
- Implement M/W/DBE and SBE subcontractor substitution standards;
- Assess allocation of risk at prime and subcontract level; and
- Develop a contract-opportunities forecast.

Marin Transit will continue to participate in the DBE research, educational, and outreach activities with its San Francisco Bay Area peers in the Business Outreach Committee. Marin Transit will monitor its current and future procurements to identify possible trends in DBE participation, progress in meeting its race neutral goal, and determine whether a race conscious goal is needed.

**Historic DBE Participation in Marin Transit Contracts**

Marin Transit became a direct federal recipient in 2013. The District has had a limited number of federally assisted contracts.

The District submitted its second DBE goal and methodology to FTA in August 2016 for FFY 2017-2019, with an identified a DBE goal of 6 percent. The 6 percent figure was determined by including the District’s primary procurement in FY 2017 to construct the $4.7 million Downtown Novato Transit Facility. This project combined four bus stops into one location and was the District’s most extensive and costly project to date. The final portfolio of funding sources had not been determined when Marin Transit submitted its FFY 2017-19 goal. Marin Transit’s DBE Officer assumed the possibility of using federal funds for the project and included all the contract dollars for Novato Transit Facility in developing the 2017-19 DBE goal.

The DBE officer set a 10 percent goal for the Novato Transit Facility construction contract. The selected bidder was also the responsive bidder and committed to meeting the 10 percent goal based on the entire cost of the project. Marin Transit verified the skills and demonstrated participation of a total of five DBE firms that were utilized to complete this project. In addition, a portion of the project work was carried out by an organization that supports local youth employment development - the North Bay Conservation Corps. Ultimately, Marin Transit dedicated only local and state grant funds and revenues to this $4.7 million project. As no federal funds were used on the project, the District did not meet Marin Transit’s federal DBE goal.

Marin Transit’s largest federally supported procurement for FFY 2017-19 was the purchase of a Mobile Information Kiosk Vehicle to provide information for passengers riding the Muir Woods Shuttle to Muir Woods National Monument. In the FFY 17-19 goal, Marin Transit assumed that this would be a construction project and not a specialty vehicle.
The remaining projects for FFY 17-19 primarily consisted of highly specialized equipment purchases for new buses: fareboxes, on-board camera systems, automated passenger counters, regional electronic smart card readers, and automated vehicle annunciators. These are consistent with current equipment technologies and systems at the local Marin Transit and regional level. Two other projects required highly specialized skills and experience: a Radio communication needs assessment and a Space needs analysis for a future operations and maintenance facility.

There is DBE participation in Marin Transit’s rural 5311 contract through a subcontract, which the District has historically reported to Caltrans. Beginning April 1, 2020, Caltrans has agreed to allow Marin Transit to report its DBE participation in a Section 5311 supported contract directly to FTA for FFY 20-22. Marin Transit does not expect to rebid this contract during that time period.

The District’s experience with efforts to secure DBE participation in operations contracts consists of the rural services contract. Marin Transit encouraged bidders to assist the District in meeting a 6 percent overall DBE goal. After extensive documented efforts to reach out DBEs, the successful bidder was able to identify and subcontract with a uniform supplier for an estimated 1 percent of the federal 5311 funds associated with the contract. A DBE fuels supplier back out of the contract after the procurement was awarded.

In the US DOT Tips for Goal Setting in the Disadvantaged Business Enterprise Program, page 7 suggests that an agency can make a Step 2 adjustment by averaging the base figure with the past median DBE participation. This approach has limitations for Marin Transit due to its small number of federally supported contracts.

Excluding the rural 5311 program reported to Caltrans, the DBE participation rate in Marin Transit’s federally assisted contracts is based on the proportion of new federally assisted contracts awarded to DBEs during FFY 2017-19 as follows:
- FFY 2017: 0%
- FFY 2018: 0%
- First half of FFY 2019: 0%

Using the method in the *Tips for Goal Setting*, the median of 0% percent is the historic participation rate in federally supported procurements. An adjusted goal would be determined in the following formula:
1. FFY 2020-22 Base Figure = 6.63%
2. Median Past Participation = 0%
3. Adjustment Factor = (6.63%) + (0%) divided by 2 = 3.315%
Consideration of an Adjusted Overall DBE Goal for FFY 2020-22
Marin County Transit District has concluded that the 6.63 percent figure should be adjusted. This is based on the Step 2 analysis, experience with DBE participation in the District’s operations contracts, and sole source vehicle and electronic fare technology purchases.

The District’s experience with efforts to secure DBE participation in operations contracts consist of the rural services 5311 program. In that procurement, Marin Transit encouraged bidders to assist the District in meeting a 6 percent overall DBE goal. After extensive documented efforts to reach out DBEs, the successful bidder was able to identify and subcontract with a uniform supplier for approximately 1 percent of the total value of the anticipated federal funding from Section 5311 rural funds.

FFY 20-22 Procurements and DBE Opportunities
In FFY 2020-22, the following anticipated vehicle equipment purchases will be sole source procurements consistent with the District’s current technologies and regional systems. These include: Mobile Data Terminals, Automated Vehicle Annunciators, & Automated Passenger Counters, Emergency Radios, and Regional Electronic Fare Counters (Clipper).

The remaining anticipated contract awards are for two operations-related contracts: primarily for the ADA paratransit contract and possibly for a travel navigator program serving senior and disabled residents. Marin Transit currently contracts with a local non-profit social service organization for both services. The organization’s mission to serve Marin’s senior and disabled residents. Marin Transit does not anticipate any federally supported construction projects for the FFY 20-22 period.

Marin Transit’s DBE officer has identified three possible areas for unbundling the ADA paratransit contract: uniforms, information technology support, and vehicle washing. Marin Transit does not currently own or lease a maintenance and operations facility. The District fuels paratransit vehicles at the Marin County-owned garage operated by the County Public Works Department. In the absence of a District or contractor-owned fueling facility, there are no DBE opportunities associated with fueling for paratransit vehicles.

In anticipation of a new ADA paratransit contract in late FFY 2022, Marin Transit will continue to work to identify possible DBE firms that may be able to provide the skills or services necessary to deliver the District’s paratransit services. Since the start of the current contract in 2017, Marin Transit has consistently requested that the current contractor pursue arrangements with DBE suppliers or services and has provided information and tools to assist with that effort.

The District has some experience with its Section 5311-supported rural services contract and efforts to identify DBEs subcontractors for that contract. The successful bidder demonstrated a substantial good faith effort and was able to subcontract with a DBE uniform supplier. The proportional cost of uniforms for the
District’s 5311 supported operating contract is 1 percent of the anticipated federal grant amount in the award. To develop an adjustment to the FFY 20-22 goal, Marin Transit considers its past experience with DBE participation in an operations contract award at 1 percent.

The sole source vehicle equipment and fare technology purchases equal 2.55 percent of the 6.63 percent identified in the Step 1 calculations. Removing the vehicle equipment and regional electronic fare technology purchases lowers the Step 1 result to 4.08 percent.

The District’s DBE opportunities will consist of the FFY 2022 paratransit operations procurement, in the last year of the goal period, and the travel navigator contract for Marin’s senior and disabled residents. The latter assumes that the District continues to receive 5310 funds for that purpose.

Marin Transit has achieved 1 percent DBE participation in the 5311 rural operations contract award. The District will pursue a 3.3 percent FFY 20-22 DBE goal, and does not anticipate that it will achieve that goal until the final year of the three-year goal period.

Marin Transit proposes an overall DBE goal of 3.3 percent of federal funds that will be expended in FTA-assisted contracts in FFY 2020-2022, exclusive of funds for the purchase of transit vehicles.

Use of Race-Neutral Methods and DBE Contract Goals
The U.S. DOT regulations require that race-neutral methods be used to the maximum extent feasible to achieve the DBE overall goal. Race-neutral methods include making efforts to assure that bidding and contract requirements facilitate participation by DBEs and other small businesses; unbundling large contracts to make them more accessible to small businesses; encouraging prime contractors to subcontract portions of the work that they might otherwise perform themselves; and providing technical assistance, communications programs, and other support services to facilitate consideration of DBEs and other small businesses.

Because of the emphasis on race-neutral methods, Marin County Transit District does not propose to set contract-specific DBE goals on FTA-assisted contracts to be awarded in Federal Fiscal Year 2020 through Fiscal Year 2022. Instead, the District will focus on developing race-neutral methods for facilitating DBE participation. The District will advise prospective contractors of areas for possible subcontracting, and of the availability of ready, willing, and able subcontractors, including DBE firms, to perform such work. The District will carefully monitor its progress during the year and may establish contract-specific goals if race-neutral methods do not appear sufficient to achieve the overall DBE participation goals for Federal Fiscal Year 2020 through Fiscal Year 2022. It is anticipated that the DBE goal for FTA-assisted contracts will be achieved through race-neutral methods.
Public Participation in Setting the Overall DBE Goal

Under 26.45(g), Marin Transit participates in various professional services and/or construction outreach and assistance events throughout the year. Marin Transit is a member of the Business Outreach Committee (BOC) a group of 26 transit and transportation agencies located in the San Francisco Bay Area that includes BART, SFMTA, Caltrans, Golden Gate Bridge, Highway and Transportation District, SamTrans/JPB, AC Transit, Alameda CTC, Sonoma County, Central Contra Costa Transit Authority, the Metropolitan Transportation Commission, and other smaller agencies.

The BOC held a joint community-based organization and public participation meeting at AC Transit in Oakland on April 2, 2019 to receive comments pertinent to the FFY 2020-2022 goal-setting processes. Member agencies presented their upcoming procurements along with other opportunities projected for FFY 2020 and beyond, and members of the public were given opportunities to provide comments. The purpose of these sessions was to obtain input in the goal-setting process, specifically on the availability of ready, willing, and able DBEs relative to all businesses ready, willing, and able to compete for U.S. DOT-assisted contracts.

The BOC conducted the consultation meeting and public participation sessions to provide information about the DBE program applicable to U.S. DOT-funded contracts, and to obtain pertinent input from businesses and organizations that are most impacted by the DBE goals established for U.S. DOT-assisted contracts.

The BOC and other participating agencies disseminated copies of a notice inviting representatives of various groups, organizations, and agencies to attend the public participation session. These included minority, women’s, and general professional and trade organizations, and other organizations that could be expected to have information concerning the availability of disadvantaged and non-disadvantaged businesses, the effects of discrimination on opportunities for DBEs, and the District’s efforts to establish a level playing field for the participation of DBEs.

Copies of the notice were emailed and mailed in March 2019 to disadvantaged, minority, and women-owned businesses and to over 170 general contractor groups and community organizations. These organizations are knowledgeable about the availability of disadvantaged and non-disadvantaged businesses and the effects of discrimination on contracting opportunities for DBEs. In the North Bay, these organizations include the Marin Small Business Development Center, North Bay Black Chamber of Commerce, Hispanic Chamber of Commerce of Marin, the Chambers of Commerce for individual Marin Cities and Towns, and the North Coast Builders Exchange.

Of the 170 invited community and business organizations only VSCE participated in the consultation session. VSCE represents the Conference of Minority Transportation Officials. The discussion in the consultation session is summarized below:
• VSCE asked how the BOC could better reach contractors since their firm was the only participant in attendance for this session. He stated that it would be great to have one main website at least at the regional level of all agency contracting opportunities instead of having to register through each individual website.

• BOC members asked VSCE how they become aware of job opportunities before they are advertised. They participate in many networking opportunities and agency events. The BOC provides match-making events to build connections with prime contractors. The BOC may consider fine-tuning its annual “Meet the Primes” events to create more 1-on-1 opportunities/interviews for DBEs/SBEs and prime contractors.

• A VSCE representative stated that DBEs need assistance with financial forms in the procurement process if they have not done it before. It would be helpful for agencies to hold separate sessions to assist in completing all required forms and all involved departments should be present at those meetings.

• A BOC member asked VSCE what types of financial requirements they have for the firms they work with. The representative stated that they generally have payment mechanisms in place that are consistent with state law. Agencies asked how others were encouraging their primes to submit bills on time and what types of different payment mechanisms were there to ensure subcontractors were being paid on time and primes were being held accountable. A BOC member noted that one payment mechanism was using an escrow account to ensure subcontractors were being paid on time. This is something agencies can consider during the contract negotiations process.

• Members asked if VSCE had any suggestions for resources and how the BOC could assist. Ms. Chambers noted more outreach and partnering up with different organizations (i.e. Conference of Minority Transportation Officials (COMTO)).

• A VSCE representative asked about the difference between the BOC consultation and public participation sessions. The BOC chair explained that the consultation session is intended for business organizations, chambers of commerce, etc. to provide feedback and information on the DBE/SBE communities they work with. The public participation session is open to the general public and DBE/SBE community to comment on the goal-setting methodology agencies use to establish their overall goals and/or the DBE program in general.

• A BOC member asked the VSCE representative how busy their organizations are and noted that his agency has had several solicitations that have had few or no bids. The member asked for input on different advertising strategies and how other agencies were getting their information out.

For the public participation session, the Business Outreach Committee sent invitations to 8,700 firms on the BOC mailing list including minority and women
businesses, DOT grantees, and consultants/contractors. Over 70 firms registered for the public participation session, and 35 firms attended in addition to BOC member agencies.

The session provided information about the availability of certified and potential DBEs willing and able to compete for DOT-assisted contracts, an opportunity to discuss their concerns, and perspectives on how DOT recipients might more effectively administer their programs to improve DBE participation. During the public participation session, BOC member agencies discussed their respective DOT-assisted contracting opportunities projected for FFY 2019, and a forecast of contracting opportunities through FFY’s 2020/2021 and 2021/2022.

Of the 65 firms that attended the April 2, 2019 public participation meeting, many emphasized the need for more outreach to the DBE community and for additional notification about upcoming procurement activities. Questions and comments included:

- Are race-neutral goals being phased out? Are you finding more success in race-conscious goals? They must be narrowly tailored based on a disparity study.
- How does an agency have a 0% proposed goal?
- Is there anywhere on your website(s) where we can see past DBE participation/goal attainment? It would helpful to see the attainment and how DBEs could help achieve those goals. Proposed goals with past attainments will be posted on individual agency websites, and the FTA website lists its top fifty grantees past goals and attainment.
- Request that all agencies coordinate to create one major report that captures cumulative data related to the DBE program. This may include progress, challenges, participation, payments, etc. There are challenges with DBEs and SBEs being paid on time. The program should help small businesses grow and profit in the State of California.
- What level or tier are DBEs participating on contracts? How can DBEs take a larger role? FTA encourages agencies to unbundle contracts, though it can be a challenge.
- What resources are available to SBEs?
- How do businesses start forming teams before an RFP is issued? The BOC offers opportunities to help DBEs/SBEs build working relationships through matchmaking, networking, and interviews/1-on-1 with primes. DBEs are encouraged to contact project managers at the specific agency and contact primes in advance. They typically maintain a vendor database during the procurement process that lists all firms interested in a specific project.
- Our firm is interested in a solicitation and has begun the process of reaching out to DBEs. Not all DBEs will call back/respond or are not interested. What can we do? The DBE Officer can assist as some DBEs may need to update their phone numbers, have moved, etc.

Additional comments included requests to improve notification of upcoming opportunities to vendors and for workshops on insurance and strategic planning.
The BOC advised the participants that it holds quarterly events, such as networking sessions, insurance and bonding, how to get certified, etc. The BOC issues a quarterly newsletter with upcoming contracting opportunities, helpful hints on how to respond to bids, information on no-cost educational courses, and contact information for each BOC member’s DBE Liaison and/or Contract Administrators.

On June 27, 2019, Marin Transit posted a Public Notice of the availability of the proposed revised DBE goal methodology in English and Spanish, with a link to this document, for public review and comment on the District’s website at www.marintransit.org. The notice also informs the public that the proposed goal and rationale are available for inspection during normal business hours for 30 days following the date of the Public Notice.

**Conclusion**

Marin Transit has prepared this goal setting and methodology report for submission to FTA, in compliance with the procedures outlined in 49 CFR Part 26, as amended, requiring DOT grantees to establish a DBE overall goal as a percentage of all FTA funds expected to be expended in the three forthcoming federal fiscal years. A 3.3% DBE overall goal has been established for all FTA-funded contracts anticipated to be awarded for FFY 2020-2022.

Marin Transit will monitor progress on the DBE overall goal by tracking each individual contract throughout the term of the contract for DBE participation and payments respective to the federal fiscal year of award.

Public Notice Disadvantaged Business Enterprise (DBE) Goal For Federal Fiscal Years 2020-2022

In accordance with regulations of the U.S. Department of Transportation (DOT), 49 CFR Part 26, Marin County Transit District announces its proposed goal over the following Federal Fiscal Years 2020, 2021, and 2022 goal of 3.3% for DBE participation on contracts assisted by the Federal Transit Administration (FTA).

The proposed goal and its rationale are available for public review for the next 30 days during normal business hours from 8:30 a.m. to 5:00 p.m., Monday through Friday, at the offices of Marin County Transit District, 711 Grand Avenue, Suite 110 in San Rafael, CA 94901, and on our web page at www.marintransit.org/purchasing.html.

Written comments will be accepted by Marin County Transit District and FTA for 30 days following publication of this notice. The District’s Federal Fiscal Year 2020-2022 goal may be adjusted by any comments received.

Interested parties are encouraged to submit comments to:

Empresa Comercial en Desventaja (DBE) meta de Marin Transit para los años fiscales 2020-2022

De acuerdo con los regulaciones del Departamento de Transportación de los EE.UU. (DOT), 49 CFR Parte 26, El Distrito de Tránsito de Marin (Marin Transit) anuncia su meta propuesta para los siguientes años fiscales 2020, 2018 y 2022 una meta del 3.3% participación en DBE en contratos con la ayuda de la Administración Federal de Transito (FTA).

La meta propuesta y su razón fundamental están disponibles para opinión pública para los próximos 30 días entre las horas normales 8:30 a 5:00p.m., Lunes a Viernes, en las oficinas de Marin Transit, 711 Grand Avenue, Suite 110 en San
Rafael, CA 94901, y también por nuestra página de web
www.marintransit.org/purchasing.html.

Comentarios escritos estarán aceptados por Marin Transit y FTA para 30 días después de publicación de la noticia presente. La meta del año fiscal 2020-2022 del Distrito puede ser ajustado por los comentarios recibidos.

Se anima a los interesados a enviar sus observaciones a:

Amy Van Doren, DBE Oficial
Marin County Transit District
